FREE *NAVLIPI* KEYBOARD FOR WINDOWS PC

Download Instructions

This is the SINGLE keyboard for NAVLIPI.

(1) First remove (uninstall) previous versions of NAVLIPI (if any). Go to *Settings > Apps* to find and uninstall the previous NAVLIPI version.

(2) Now Go to (click on):
https://drive.google.com/drive/folders/1C7Lp3GA8jp_Jasti4xcuHxJ9eo8fsClX?usp=sharing

(3) Click on the Download button (down arrow) at upper right to download files. It may prompt you with the message "Google Drive can't scan this file for viruses. Navlipi……...zip (55M) is too large for Google to scan for viruses. Would you still like to download this file?" Click "*Download anyway*".

(4) The downloaded files are in a Zip folder. Double click on the Zip folder to see its contents, then double click on the Application file (*NavlipiKeyboardBundleInstaller)*. It will ask you "For the application to run properly, it is recommended that you first extract all files". Click "*Extract all."*

(5) Once extracted, double click again on the Application file. It will then prompt you to accept the NAVLIPI license agreement. Click yes. Go ahead and install.

(6) To check if keyboard is successfully installed, hit the **Windows button and the space bar**. This will make a list of the available keyboards on your computer appear in the lower right corner of your screen. Make sure "*ENG English (United States) Navlipi*" is one of the keyboards listed. *(You can also use this key sequence, Windows button and the space bar, to quickly toggle between your various keyboards*.)

(7) That's it!

(8) *NOTE*: The separate document, *NAVLIPI_Keyboard_Layout_for_Reference_a.pdf*, which has an image of the keyboard, can be used for reference.
